PROFILE

Senior iOS engineer with 10+ years of experience in native app delivery, maintainable architecture and legacy-code recovery. Works with Swift, SwiftUI, UIKit, Combine and MVVM / Clean Architecture. Experience includes stabilising inherited apps, improving responsiveness and memory use, and supporting engineering standards through mentoring and code review. Interested in iOS platform roles focused on architecture, reliability and developer workflows.

CORE EXPERTISE

Native iOS: Swift, Objective-C, SwiftUI, UIKit, Auto Layout, SpriteKit, Core Animation

Architecture: MVVM, Clean Architecture, VIPER/VIP, Swift Concurrency, Combine, RxSwift

Data & integration: REST, GraphQL, WebSocket, Core Data, Firebase, SQLite; MapKit, Core Bluetooth, HealthKit

Quality & delivery: XCTest, unit/UI tests, Instruments, Git, Fastlane, GitHub Actions, TestFlight, SPM

AI & teamwork: Claude Code, coding-agent orchestration, AI-assisted review, mentoring, technical interviews

PROFESSIONAL EXPERIENCE

Freelance Senior iOS Developer

Self-employed | Sep 2026 - Present

- Available for native iOS product development, architecture, legacy-app improvements and performance work.
- Open to full-time employment and contract engagements, remote or with relocation.

Senior iOS Developer (Senior Engineer)

Endava | Jan 2022 - Aug 2026

Additional roles: AI Champion, Dec 2025 - Aug 2026; Career Coach, Mar 2024 - Aug 2026.

- Led iOS development for insurance and telecom clients, owning application lifecycles from concept to production with SwiftUI, UIKit, Combine and MVVM / Clean Architecture.
- Worked on Ding payment and account flows and the DXP insurance platform; see selected client projects.
- As Career Coach, mentored iOS developers through growth plans and 1:1 sessions, conducted technical interviews and contributed to coding standards.

Senior iOS Developer

Darwin Digital | Nov 2019 - Jan 2022

- Built healthcare apps, including AI-supported pain-detection applications, with secure data handling in HIPAA-sensitive environments.
- Refactored inherited codebases and improved stability, responsiveness and memory use in collaboration with research, data-science and backend teams.

iOS Developer (Junior to Mid-level)

Comit International | Jul 2015 - Nov 2019

- Developed social, logistics, on-demand and betting apps with Objective-C, Swift, UIKit and Firebase; maintained both modern and inherited codebases.

EDUCATION & LANGUAGES

VPTS, Užice - Information Technology: Specialist of Applied Studies, 2013 - 2014 (GPA 9.63/10); Undergraduate Applied Studies, 2008 - 2013.

Languages: Serbian (native) · English (full professional proficiency)

Selected work

Client delivery & iOS engineering

Screenshots and project details: mzs1207.github.io/milos-portfolio-ios

CLIENT PROJECTS

DXP - Hybrid Insurance Platform

Endava | 2024 - Aug 2026

Contributed to mobile and cross-platform implementation for an insurance platform, with a focus on a consistent experience across devices.

Swift · SwiftUI · Combine · CI/CD

Ding - Global Mobile Recharge

Endava | 2023 - 2024

Worked on the iOS app for a platform serving 150+ countries, including secure payments, user accounts and evolving business requirements.

Swift · Stripe SDK · Core Data

Schüco SmartTouch - Smart Door Control

Freelance project | 2024 - 2025

Revived and stabilised an inherited smart-door application with Bluetooth unlock, Touch ID, remote access and live door status.

Swift · Core Bluetooth · Touch ID · Push Notifications

SELECTED INDEPENDENT ENGINEERING

BeamBike - E-Bike Sharing MVP

Independent multi-platform project

Built a mobility MVP spanning native iOS and Android apps, a backend, admin dashboard and IoT simulator, with geofenced maps and realtime fleet updates.

SwiftUI · Kotlin · Node.js · PostgreSQL · Redis · WebSocket

Bug Corp Duel - Strategy Card Game

Independent iOS project

Built a deterministic game engine with a 132-card library, local AI duels and peer-to-peer multiplayer architecture.

SwiftUI · SpriteKit · MultipeerConnectivity · Swift Concurrency

ENGINEERING LEADERSHIP & WORKFLOWS

At Endava, supported AI adoption through developer enablement, code review, project integration and workflow automation. Mentored iOS developers and conducted technical interviews.

Built The Hive, a personal coding-agent workflow with shared schema contracts, code generation and automated build/test checks. Uses AI-assisted development with hands-on engineering review.

ADDITIONAL PORTFOLIO WORK

Bubble Chase (CatChase), a SpriteKit arcade game with physics, power-ups and daily challenges. More applications and games, with screenshots, are available in the portfolio.
