PROFILE

Senior iOS engineer with 10+ years of experience and 25+ shipped apps across insurance, healthcare, fintech, telecom and consumer products. Delivers native applications with Swift, SwiftUI and UIKit, from concept to production. Experience includes payment and account flows, healthcare applications and recovery of inherited codebases. Former Senior Engineer at Endava, with mentoring and technical interviewing responsibilities.

CORE EXPERTISE

Native iOS: Swift, Objective-C, SwiftUI, UIKit, Auto Layout, SpriteKit, Core Animation

Architecture: MVVM, Clean Architecture, VIPER/VIP, Swift Concurrency, Combine, RxSwift

Data & integration: REST, GraphQL, WebSocket, Core Data, Firebase, SQLite; MapKit, Core Bluetooth, HealthKit

Quality & delivery: XCTest, unit/UI tests, Instruments, Git, Fastlane, GitHub Actions, TestFlight, SPM

AI & teamwork: Claude Code, coding-agent orchestration, AI-assisted review, mentoring, technical interviews

PROFESSIONAL EXPERIENCE

Freelance Senior iOS Developer

Self-employed | Sep 2026 - Present

- Available for native iOS product development, architecture, legacy-app improvements and performance work.
- Open to full-time employment and contract engagements, remote or with relocation.

Senior iOS Developer (Senior Engineer)

Endava | Jan 2022 - Aug 2026

Additional roles: AI Champion, Dec 2025 - Aug 2026; Career Coach, Mar 2024 - Aug 2026.

- Led iOS development for insurance and telecom clients, owning application lifecycles from concept to production with SwiftUI, UIKit, Combine and MVVM / Clean Architecture.
- Worked on Ding payment and account flows and the DXP insurance platform; see selected client projects.
- As Career Coach, mentored iOS developers through growth plans and 1:1 sessions, conducted technical interviews and contributed to coding standards.

Senior iOS Developer

Darwin Digital | Nov 2019 - Jan 2022

- Built healthcare apps, including AI-supported pain-detection applications, with secure data handling in HIPAA-sensitive environments.
- Refactored inherited codebases and improved stability, responsiveness and memory use in collaboration with research, data-science and backend teams.

iOS Developer (Junior to Mid-level)

Comit International | Jul 2015 - Nov 2019

- Developed social, logistics, on-demand and betting apps with Objective-C, Swift, UIKit and Firebase; maintained both modern and inherited codebases.

EDUCATION & LANGUAGES

VPTS, Užice - Information Technology: Specialist of Applied Studies, 2013 - 2014 (GPA 9.63/10); Undergraduate Applied Studies, 2008 - 2013.

Languages: Serbian (native) · English (full professional proficiency)

Selected work

Client delivery & iOS engineering

Screenshots and project details: mzs1207.github.io/milos-portfolio-ios

CLIENT PROJECTS

DXP - Hybrid Insurance Platform

Endava | 2024 - Aug 2026

Contributed to mobile and cross-platform implementation for an insurance platform, with a focus on a consistent experience across devices.

Swift · SwiftUI · Combine · CI/CD

Ding - Global Mobile Recharge

Endava | 2023 - 2024

Worked on the iOS app for a platform serving 150+ countries, including secure payments, user accounts and evolving business requirements.

Swift · Stripe SDK · Core Data

Schüco SmartTouch - Smart Door Control

Freelance project | 2024 - 2025

Revived and stabilised an inherited smart-door application with Bluetooth unlock, Touch ID, remote access and live door status.

Swift · Core Bluetooth · Touch ID · Push Notifications

SELECTED INDEPENDENT ENGINEERING

Translato - macOS Translation Workspace

Published on the Mac App Store | Independent product

Built a native translation workspace with bilingual segment editing, local translation memory, document previews and OCR. View Translato on the App Store.

SwiftUI · SQLite / GRDB · PDFKit · Vision

Pet Buddy - Pet Care Diary

Independent iPhone & iPad product

Built pet profiles, care timelines, reminders and documents, with Plus PDF reports and measurement trends. Preserved existing data and backup compatibility through the app rebrand.

SwiftUI · SwiftData · StoreKit 2 · PDFKit

NoteVita - Offline Family Health Diary

Independent iPhone & iPad product

Built separate family profiles, health records, medication reminders and PDF sharing. Implemented actor-based local persistence, encrypted backup/import and Plus purchase flows.

SwiftUI · Swift Concurrency · CryptoKit · StoreKit 2

ENGINEERING LEADERSHIP & WORKFLOWS

At Endava, supported AI adoption through developer enablement, code review, project integration and workflow automation. Mentored iOS developers and conducted technical interviews.

Built The Hive, a personal coding-agent workflow with shared schema contracts, code generation and automated build/test checks. Uses AI-assisted development with hands-on engineering review.

ADDITIONAL PORTFOLIO WORK

BeamBike (native mobility MVP), Bug Corp Duel (deterministic strategy card game) and Bubble Chase (SpriteKit arcade game). More projects and iPhone/iPad screenshots are available in the portfolio.
