PROFILE

Senior software engineer with 10+ years in native iOS delivery and 25+ shipped apps across insurance, healthcare, fintech, telecom and consumer products. Independent work spans native macOS products, TypeScript web platforms and games. Owns architecture, implementation, integrations and release preparation, using AI-assisted workflows with hands-on review. Former Senior Engineer at Endava, with mentoring and technical interviewing responsibilities.

CORE EXPERTISE

Apple platforms: Swift, Objective-C, SwiftUI, UIKit, AppKit, SwiftData, StoreKit 2

Architecture & data: MVVM / Clean Architecture, Swift Concurrency, Combine, Core Data, SQLite, REST / GraphQL

Web & APIs: TypeScript, React, Next.js, Node.js, NestJS, PostgreSQL; React Native / Expo

Games: SpriteKit, gameplay systems, deterministic simulation, local-network co-op

Quality & delivery: XCTest, unit/UI tests, Instruments, GitHub Actions, Fastlane, TestFlight, App Store releases

AI & leadership: Coding-agent orchestration, hands-on review, mentoring, technical interviews

PROFESSIONAL EXPERIENCE

Independent Senior Software Engineer

Self-employed | Sep 2026 - Present

- Builds native Apple apps, web platforms and games, from architecture and API integration to release preparation.
- Uses coding agents with hands-on review and build/test validation; available for full-time and contract work.

Senior iOS Developer (Senior Engineer)

Endava | Jan 2022 - Aug 2026

Additional roles: AI Champion, Dec 2025 - Aug 2026; Career Coach, Mar 2024 - Aug 2026.

- Led iOS development for insurance and telecom clients, owning application lifecycles from concept to production with SwiftUI, UIKit, Combine and MVVM / Clean Architecture.
- Worked on Ding payment and account flows and the DXP insurance platform; see selected client projects.
- As Career Coach, mentored iOS developers through growth plans and 1:1 sessions, conducted technical interviews and contributed to coding standards.

Senior iOS Developer

Darwin Digital | Nov 2019 - Jan 2022

- Built healthcare apps, including AI-supported pain-detection applications, with secure data handling in HIPAA-sensitive environments.
- Stabilised inherited apps and improved responsiveness and memory use with research, data-science and backend teams.

iOS Developer (Junior to Mid-level)

Comit International | Jul 2015 - Nov 2019

- Developed social, logistics, on-demand and betting apps with Objective-C, Swift, UIKit and Firebase; maintained both modern and inherited codebases.

EDUCATION & LANGUAGES

VPTS, Užice - Information Technology: Specialist of Applied Studies, 2013 - 2014 (GPA 9.63/10); Undergraduate Applied Studies, 2008 - 2013.

Languages: Serbian (native) · English (full professional proficiency)

Selected work

Native apps · Web platforms · Games · Product delivery

Screenshots and project details: mzs1207.github.io/milos-portfolio-ios

CLIENT PROJECTS

DXP - Insurance Platform | Endava, 2024 - Aug 2026

Contributed to mobile and cross-platform implementation, with a consistent experience across devices.

Swift · SwiftUI · Combine · CI/CD

Ding - Global Mobile Recharge | Endava, 2023 - 2024

Worked on secure payments and account flows for the iOS app of a platform serving 150+ countries.

Swift · Stripe SDK · Core Data

Schüco SmartTouch | Freelance, 2024 - 2025

Revived an inherited smart-door app: Bluetooth unlock, Touch ID, remote access and live door status.

Swift · Core Bluetooth · Push Notifications

SELECTED INDEPENDENT ENGINEERING

Translato - Native macOS Translation Workspace

Built bilingual editing, local translation memory, document previews and OCR. Published on the Mac App Store.

SwiftUI · SQLite / GRDB · PDFKit · Vision

Pet Buddy & NoteVita - Native iPhone / iPad Products

Pet-care timelines, reminders and PDF reports; offline family health records, encrypted backup/import and purchase flows.

SwiftUI · SwiftData · Swift Concurrency · CryptoKit · StoreKit 2

Sjaj - Web, Mobile & API Platform

Developing a cleaning-business platform: manager dashboard, customer booking, job checklists and shared web/mobile contracts. Portfolio shows seeded demo data.

TypeScript · Next.js · React Native / Expo · NestJS · PostgreSQL

Wellness Spot - Responsive Customer Workspace

Built customer views for measurements, progress, nutrition plans and package status, with desktop and phone navigation. Portfolio uses synthetic data.

TypeScript · React · Next.js · Responsive Web

Touchline Atlas - Football Management Games

Built iPhone/iPad and native macOS experiences for career progression, squad management, tactics and saved games.

Swift · SwiftUI · AppKit · Simulation · Local Persistence

Cute Bubble Chase, Neon Rebels & BugCorpGame

Arcade gameplay and power-ups; solo/local-network co-op shooter; deterministic card-duel systems. Independent game projects at different release stages.

Swift · SwiftUI · SpriteKit · Network.framework · Gameplay Systems

ENGINEERING LEADERSHIP & WORKFLOWS

Former Endava AI Champion and Career Coach. Built The Hive, a personal AI-assisted development system used across independent apps, web platforms and games, with hands-on engineering review.
