PROFILE

Senior software engineer with 10+ years in native iOS delivery, maintainable architecture and legacy-code recovery. Builds with Swift, SwiftUI, UIKit and Swift Concurrency, with independent work extending into native macOS apps, games and web platforms. Experience includes stabilising inherited apps, improving responsiveness and memory use, mentoring and technical interviews. Focused on Apple-platform architecture, reliability and developer workflows.

CORE EXPERTISE

Apple platforms: Swift, Objective-C, SwiftUI, UIKit, AppKit, Auto Layout, SpriteKit

Architecture: MVVM / Clean Architecture, VIPER/VIP, Swift Concurrency, Combine, RxSwift

Data & integration: REST, GraphQL, WebSocket, Core Data, SwiftData, SQLite; Core Bluetooth, HealthKit

Quality & delivery: XCTest, unit/UI tests, Instruments, GitHub Actions, Fastlane, TestFlight, SPM

Product breadth: Native macOS tools and games; TypeScript, React / Next.js and Node.js platforms

AI & leadership: Coding-agent orchestration, hands-on review, mentoring, technical interviews

PROFESSIONAL EXPERIENCE

Independent Senior Software Engineer

Self-employed | Sep 2026 - Present

- Builds native Apple apps, web platforms and games, from architecture and API integration to release preparation.
- Uses coding agents with hands-on review and build/test validation; available for full-time and contract work.

Senior iOS Developer (Senior Engineer)

Endava | Jan 2022 - Aug 2026

Additional roles: AI Champion, Dec 2025 - Aug 2026; Career Coach, Mar 2024 - Aug 2026.

- Led iOS development for insurance and telecom clients, owning application lifecycles from concept to production with SwiftUI, UIKit, Combine and MVVM / Clean Architecture.
- Worked on Ding payment and account flows and the DXP insurance platform; see selected client projects.
- As Career Coach, mentored iOS developers through growth plans and 1:1 sessions, conducted technical interviews and contributed to coding standards.

Senior iOS Developer

Darwin Digital | Nov 2019 - Jan 2022

- Built healthcare apps, including AI-supported pain-detection applications, with secure data handling in HIPAA-sensitive environments.
- Stabilised inherited apps and improved responsiveness and memory use with research, data-science and backend teams.

iOS Developer (Junior to Mid-level)

Comit International | Jul 2015 - Nov 2019

- Developed social, logistics, on-demand and betting apps with Objective-C, Swift, UIKit and Firebase; maintained both modern and inherited codebases.

EDUCATION & LANGUAGES

VPTS, Užice - Information Technology: Specialist of Applied Studies, 2013 - 2014 (GPA 9.63/10); Undergraduate Applied Studies, 2008 - 2013.

Languages: Serbian (native) · English (full professional proficiency)

Selected work

Native apps · Web platforms · Games · Product delivery

Screenshots and project details: mzs1207.github.io/milos-portfolio-ios

CLIENT PROJECTS

DXP - Insurance Platform | Endava, 2024 - Aug 2026

Contributed to mobile and cross-platform implementation, with a consistent experience across devices.

Swift · SwiftUI · Combine · CI/CD

Ding - Global Mobile Recharge | Endava, 2023 - 2024

Worked on secure payments and account flows for the iOS app of a platform serving 150+ countries.

Swift · Stripe SDK · Core Data

Schüco SmartTouch | Freelance, 2024 - 2025

Revived an inherited smart-door app: Bluetooth unlock, Touch ID, remote access and live door status.

Swift · Core Bluetooth · Push Notifications

SELECTED INDEPENDENT ENGINEERING

Translato - Native macOS Translation Workspace

Built bilingual editing, local translation memory, document previews and OCR. Published on the Mac App Store.

SwiftUI · SQLite / GRDB · PDFKit · Vision

Pet Buddy & NoteVita - Native iPhone / iPad Products

Pet-care timelines, reminders and PDF reports; offline family health records, encrypted backup/import and purchase flows.

SwiftUI · SwiftData · Swift Concurrency · CryptoKit · StoreKit 2

Sjaj - Web, Mobile & API Platform

Developing a cleaning-business platform: manager dashboard, customer booking, job checklists and shared web/mobile contracts. Portfolio shows seeded demo data.

TypeScript · Next.js · React Native / Expo · NestJS · PostgreSQL

Wellness Spot - Responsive Customer Workspace

Built customer views for measurements, progress, nutrition plans and package status, with desktop and phone navigation. Portfolio uses synthetic data.

TypeScript · React · Next.js · Responsive Web

Touchline Atlas - Football Management Games

Built iPhone/iPad and native macOS experiences for career progression, squad management, tactics and saved games.

Swift · SwiftUI · AppKit · Simulation · Local Persistence

Cute Bubble Chase, Neon Rebels & BugCorpGame

Arcade gameplay and power-ups; solo/local-network co-op shooter; deterministic card-duel systems. Independent game projects at different release stages.

Swift · SwiftUI · SpriteKit · Network.framework · Gameplay Systems

ENGINEERING LEADERSHIP & WORKFLOWS

Former Endava AI Champion and Career Coach. Built The Hive, a personal coding-agent workflow with shared schema contracts and automated build/test checks, supported by hands-on engineering review.
