

Miloš Stevanović

Senior iOS Developer · AI Champion · Type 5 AI Engineer

Belgrade, Serbia | +381 60 316 1917 | milosstevanovic12@yahoo.com
[LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior iOS Developer with 10+ years of experience and 25+ shipped applications across insurance, healthcare, fintech, telecommunications, and consumer products. Currently Senior Engineer at Endava, appointed AI Champion and Career Coach, leading development of high-impact mobile applications for global clients, driving adoption of AI-assisted delivery, and mentoring iOS developers. Expert in Swift, SwiftUI, UIKit, and modern architecture patterns (MVVM, Clean Architecture), with a proven record of stabilising complex legacy codebases and delivering App Store-compliant products aligned with Apple design guidelines. A Type 5 AI engineer, building complete products end-to-end by directing fleets of autonomous coding agents.

TECHNICAL SKILLS

Languages	Swift, Objective-C
UI Frameworks	SwiftUI, UIKit, Auto Layout, Core Animation
Architecture	MVVM, Clean Architecture, VIPER/VIP, Swift Concurrency (async/await, actors), Combine, RxSwift
Data & Networking	REST API, GraphQL, WebSocket, Core Data, Firebase, CloudKit, SQLite
Apple Frameworks	HealthKit, Core Location, MapKit, Core Bluetooth, Push Notifications (APNs), Core ML, ARKit
Testing & Quality	XCTest, Unit / UI / Integration Testing, TDD, Code Review, Instruments profiling
Tools & CI/CD	Xcode, Git, Fastlane, GitHub Actions, Jenkins, Azure DevOps, SPM, CocoaPods, TestFlight, Docker
Security & Payments	OAuth 2.0, Auth0, Keychain, Stripe SDK, HIPAA-compliant data handling
AI Tooling	Claude Code, multi-agent orchestration, LLM integration, AI code review, prompt engineering
Ways of Working	Agile / Scrum, Jira, Confluence, cross-functional collaboration, mentoring, technical interviews

PROFESSIONAL EXPERIENCE

Endava Jan 2022 – Present · Belgrade, Serbia
Senior iOS Developer (Senior Engineer)

AI Champion · Dec 2025 – Present **Career Coach** · Mar 2024 – Present

- Lead development of multiple high-impact mobile applications for insurance and telecommunications clients, owning app lifecycles from concept to production.
- Apply modern architectural patterns (MVVM, Clean Architecture) and technologies such as SwiftUI, UIKit, and Combine to ensure performance, scalability, and maintainability.
- As AI Champion, drive AI adoption across delivery: project integration and monitoring, developer enablement, AI-assisted code review, and workflow automation.
- As Career Coach, mentor iOS developers through structured growth plans, 1:1 sessions, workshops, and knowledge sharing; conduct technical interviews and help establish coding standards.
- Collaborate with cross-functional teams in an agile environment, contributing to smooth and predictable project delivery.

Darwin Digital Nov 2019 – Jan 2022
Senior iOS Developer

- Built healthcare technology applications with secure, HIPAA-compliant data handling, leveraging advanced mobile capabilities and emerging technologies.
- Contributed to AI-supported medical applications for pain detection in infants and elderly patients, ensuring stability, usability, and compliance in sensitive environments.
- Improved product stability and user experience by refactoring legacy codebases and optimising app performance and memory usage.
- Delivered user-centric solutions in collaboration with research teams, data scientists, and backend developers.

Comit International Jul 2015 – Nov 2019
iOS Developer (Junior to Mid-level)

- Developed applications across social networking, logistics, on-demand services, and betting, using Objective-C, Swift, UIKit, and Firebase.
- Adapted to diverse codebases ranging from clean, well-structured systems to complex inherited code, bringing clarity and stability to legacy projects.
- Progressed from junior to mid-level roles through reliability, fast learning, and effective communication.

SELECTED PROJECT HIGHLIGHTS

DXP – Hybrid Insurance Platform

Endava · 2024 – Present

Scalable hybrid solution for a major insurance provider; key role in mobile and cross-platform implementation, ensuring a smooth user experience across devices.
Swift · SwiftUI · Combine · CI/CD

Ding – Global Mobile Recharge App

Endava · 2023 – 2024

International mobile top-up platform with secure payment processing and user account management, adapting to dynamic business logic and evolving requirements.
Swift · Stripe SDK · Core Data

Schüco SmartTouch – Smart Door Control

Freelance · 2024 – 2025

Revived and stabilised an inherited smart-home application for secure door communication with fingerprint access and real-time security monitoring; improved performance and maintainability of a complex legacy codebase.
Swift · Core Bluetooth · Touch ID · Push Notifications

Health Monitoring Applications

Darwin Digital · 2019 – 2022

AI-supported medical applications for pain detection in infants and elderly patients, ensuring stability, usability, and compliance in sensitive healthcare environments.
Swift · HealthKit · Charts · HIPAA

Footballerista – Social Platform for Athletes

Comit International · 2017 – 2019

Sports-focused social networking app with player profiles, highlights sharing, and community interactions, built on a scalable architecture for a niche athletic audience.
Swift · Firebase · Core Data

PERSONAL PROJECTS

Independent products designed and shipped end-to-end with a self-built multi-agent AI orchestration framework on top of Claude Code (2026).

The Hive – Multi-Agent Development Orchestration Framework

Designed and built a multi-agent orchestration protocol for Claude Code: an architect / delegate / worker agent hierarchy, a frozen JSON Schema contract with cross-platform type generation (Swift, Kotlin, TypeScript, Python), parallel task dispatch with disjoint file ownership, automated build-and-test gates, and deterministic conflict resolution, used to deliver the projects below end-to-end.
Claude Code · Python · JSON Schema · Codegen

Bug Corp Duel – Native iOS P2P Card Game

Complete Yu-Gi-Oh-style card duel game: deterministic seeded game engine with a 100-card catalogue and reaction/trap windows, serverless peer-to-peer multiplayer, simulation-driven balance tuning across 400 automated matches, and 100+ unit and integration tests under Swift 6 strict concurrency.
SwiftUI · SpriteKit · MultipeerConnectivity · Network.framework · SPM · XcodeGen

BeamBike – E-Bike Sharing Platform MVP

Full-stack mobility MVP: Node.js/TypeScript backend (PostgreSQL, Redis, REST + realtime WebSocket), React admin dashboard, native iOS and Android apps, IoT device simulator, live geofenced maps, and i18n across 7 languages including full RTL support.
SwiftUI · Kotlin / Jetpack Compose · Node.js · PostgreSQL · Redis · WebSocket · MapLibre

Additional independent builds

Personal time-optimisation platform (PWA, REST API, native mobile), football-manager simulation, news portal, restaurant platform, and e-commerce storefront, each delivered through the same orchestrated multi-agent workflow.

EDUCATION

Specialist of Applied Studies – Information Technology

2013 – 2014

Business-Technical College of Applied Studies (VPTS), Užice, Serbia · GPA 9.63 / 10

Undergraduate Applied Studies – Information Technology

2008 – 2013

Business-Technical College of Applied Studies (VPTS), Užice, Serbia
Cooperative education (2013 – 2015): K-means clustering software and logistic-regression analysis of student exam performance.
Languages: Serbian (native) · English (full professional proficiency)
